

Project: Districtwide Document Cameras

Objective: Install Wireless Documents Cameras in Classrooms throughout the District

Funding: ESSER III Funds

Completed: 2021-22 School Year

New Wireless Document Cameras: The AVer M15W wireless document cameras were placed in all Pre-kindergarten through twelfth grade classrooms throughout the district, so that both 2D and 3D documents and objects can be displayed onto classroom whiteboards. The M15W can be moved around the classroom to feature both teacher and student work, has a 23X zoom to show fine detail, and with 4k UHD at a seamless 60fps these 13mp cameras provide excellent quality.
