

Project: Athletic Sound System Upgrades

Objective: Upgrade the Sound Systems at the High School Football Stadium, Soccer Field, Baseball Field, Softball Field, Tennis Courts, Main Gymnasium, and Auxiliary Gymnasium.

Funding: Public Improvement Fund

Completed: 2022-23 School Year

Football Stadium : Replacement and installation of full range speakers to the stadium which will cover both sides of the stadium. Addition of a digital mixer to use tablet for master volume, two wireless microphone sets (one regular and one headset), one switched microphone, and a Bluetooth/aux/CD player.

Main Gymnasium: Replacement and installation of full range speakers to the main gymnasium stands including court coverage. Addition of a digital mixer to use tablet for master volume, two wireless microphone sets, one body pack, and a Bluetooth input kit.

Auxiliary Gymnasium: Installation of full range speakers to the AUX gymnasium to cover the stands and court coverage. Addition of a digital mixer to use tablet for master volume, two wireless microphone set, one body pack, and a Bluetooth input kit.

Tennis Courts: Installation of four speakers to the central building area for coverage on all sides to reach all courts. Adding wireless microphone and Bluetooth/CD/AUX capabilities for music and/or leading instruction.

Soccer Field: Replacement and installation of amplifier and outdoor speakers to the press box. Reposition speakers to get full coverage and sound to the field and stands. Adding mic line mixer and power conditioner.

Baseball & Softball Fields: New speakers, microphones, amp, mixer, and rolling rack.
